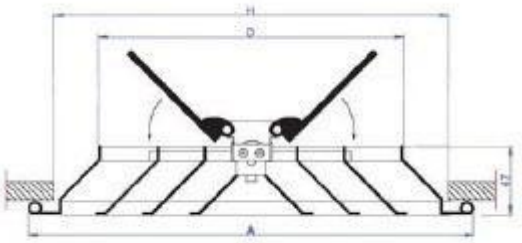
RDF VALVES

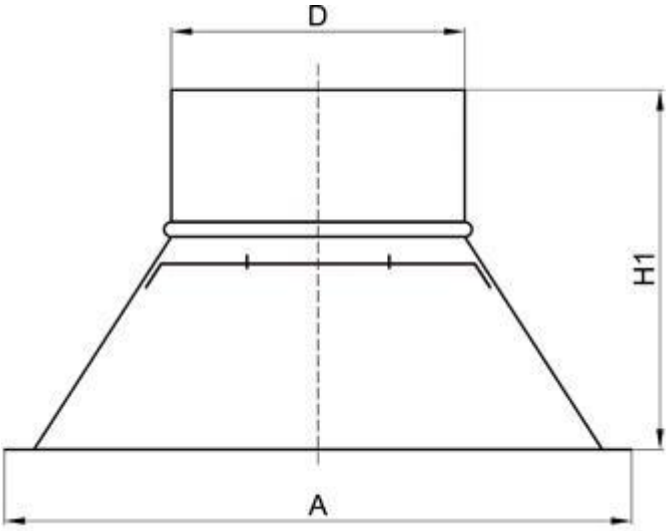


Product characteristics:

- structural elements are made of pressed aluminum,
- integrated damper made of plastic,
- powder painted white (RAL 9010),
- flat diffuser front,
- light weight even in case of large size,
- removable directional lamellas,
- easy installation and adjustment thanks to unique technical design,
- good for hot or cold air supply/exhaust,
- appropriate for systems with variable air volume

Diffuser dimensions	ØA [mm]	ØD [mm]	ØH [mm]
160	257	159	225
200	307	199	275
250	357	249	325
300	407	299	375
350	457	349	425

RDF-R Mounting ring



Product characteristics:

- made of galvanized steel,
- allows for quick and easy installation of the DS diffuser in the ceiling,
- allows for connecting the diffuser to ventilation and air conditioning systems.
